Soft Rollout – Lessons Learned

- Keeping track of training and background check records was very cumbersome and time consuming.
- Program Coordinators weren't always up-to-speed on what to expect next.
- Many of our standard waivers and emergency plans were not written with children in mind.
- The online form wasn't flexible enough for our variety of programs.
- Needed a way to keep track of staff would had been trained and checked through other programs.
- Small or new programs needed more help gathering the required documentation.

Step Three: Ongoing Process Improvement

Youth Protection 2.0

- Rebuilt the online form to make it more user friendly.
- Created a separate workflow for staff verification.
- Moved training to a different system with easier reporting.
- Worked with IT to combine the data from training and background and match it to staff records.
- Set up a library of pre-written email templates to be sent at certain stages.
- Created templates for waivers, emergency plans, and medical forms that specifically address youth participants.
